Sir:

**PRELIMINARY AMENDMENT**

In order to place the above-identified application in better condition for examination, please amend the application as follows:

**IN THE SPECIFICATION**

Replace paragraph 0003 beginning on page 1, with the following rewritten paragraph/s:

In recent years, significant advantages have been achieved by using high temperature alloys in gas turbine systems by incorporating iron, nickel and cobalt-based superalloys in coatings applied to the substrate of key turbine components. The purpose of an effective surface coating is two-fold. First, the coating must form a protective and adherent layer that guards the underlying base material against oxidation, corrosion, and
